SIGHTS

As soon as you set foot in Turin, you'll find yourself surrounded by sumptuous baroque palaces and enchanting royal palaces. Let yourself be conquered by their beauty by visiting them. You will be amazed by the refined marbles, the elaborate vaults and the precious frescoes. For a further taste of the city, take a stroll through the elegant squares of the historic centre. These are meeting places, just like the cafe's, and little shops.

Don't forget to explore the famous [portici di Torino](#), which stretches for over 18 kilometers. They offer shelter from the rain in winter and from the sun in summer, and allow you to walk comfortably through the city while admiring the shops' windows.

We recommend to pay a visit to both, the [Museo Egizio](#) and the [Museo del Cinema](#). These are two unique jewels in the European panorama and will make you experience the history and the art of the city, first-hand.

ART

In Turin you will learn to walk with your nose turned upwards. Because the city is full of murals. You'll find them at almost every corner, from the center to the suburbs. Some arise spontaneously, others are part of urban redevelopment projects.

If you want to discover the art that promotes dialogue between culture and community, you can start your tour beginning at [San Salvario](#).

Here the murals address social and environmental issues.

Barriera di Milano is another epicenter of **Street Art**, with huge murals. Made by [Millo](#).

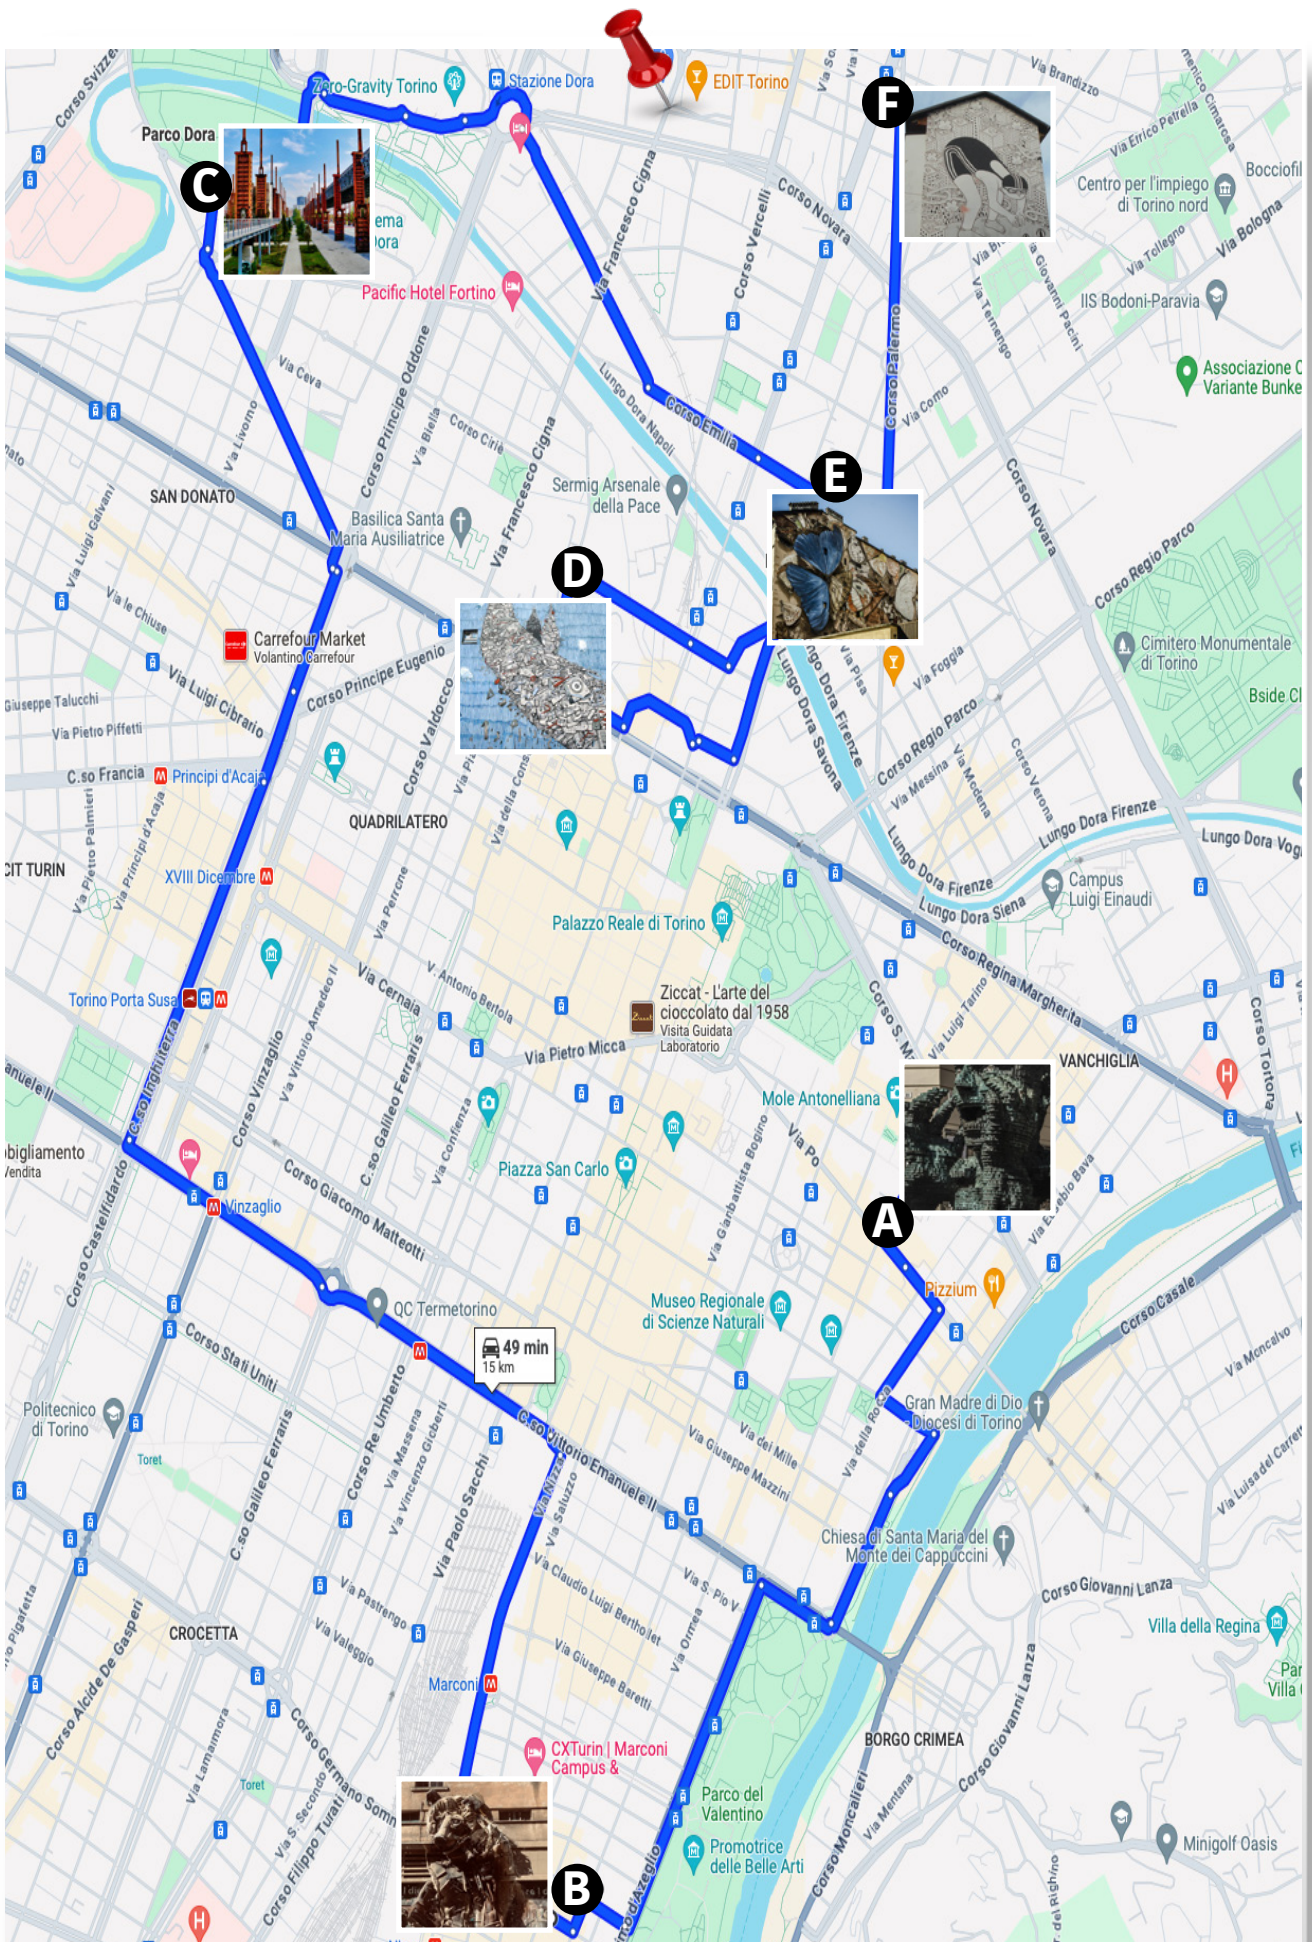

Not to be missed are the "Urban Art Museum" the [M.A.U.](#), in **Borgo Campidoglio**, and also [Parco Dora](#).

But it doesn't end there. In fact, you will continually come across unexpected works of contemporary art.

Like [Eco di Marc Didou](#), which is over six feet high.

It represents two faces, one upside down and one upright, caught in the act of screaming.

At the [Mercato del Balon](#), which you can find this is a real possibility!

Since 1857, this fascinating market has been taken place every saturday and every second sunday of the month, in the streets nearby **Piazza della Repubblica** also known as Porta Palazzo.

In the stalls there you will find a rich variety of antiques, second-hand goods, crafts, vintage and collectibles, but also used clothes, books, vintage postcards and much much more. Whether you're looking for a deal or just curious, you'll always find something interesting.

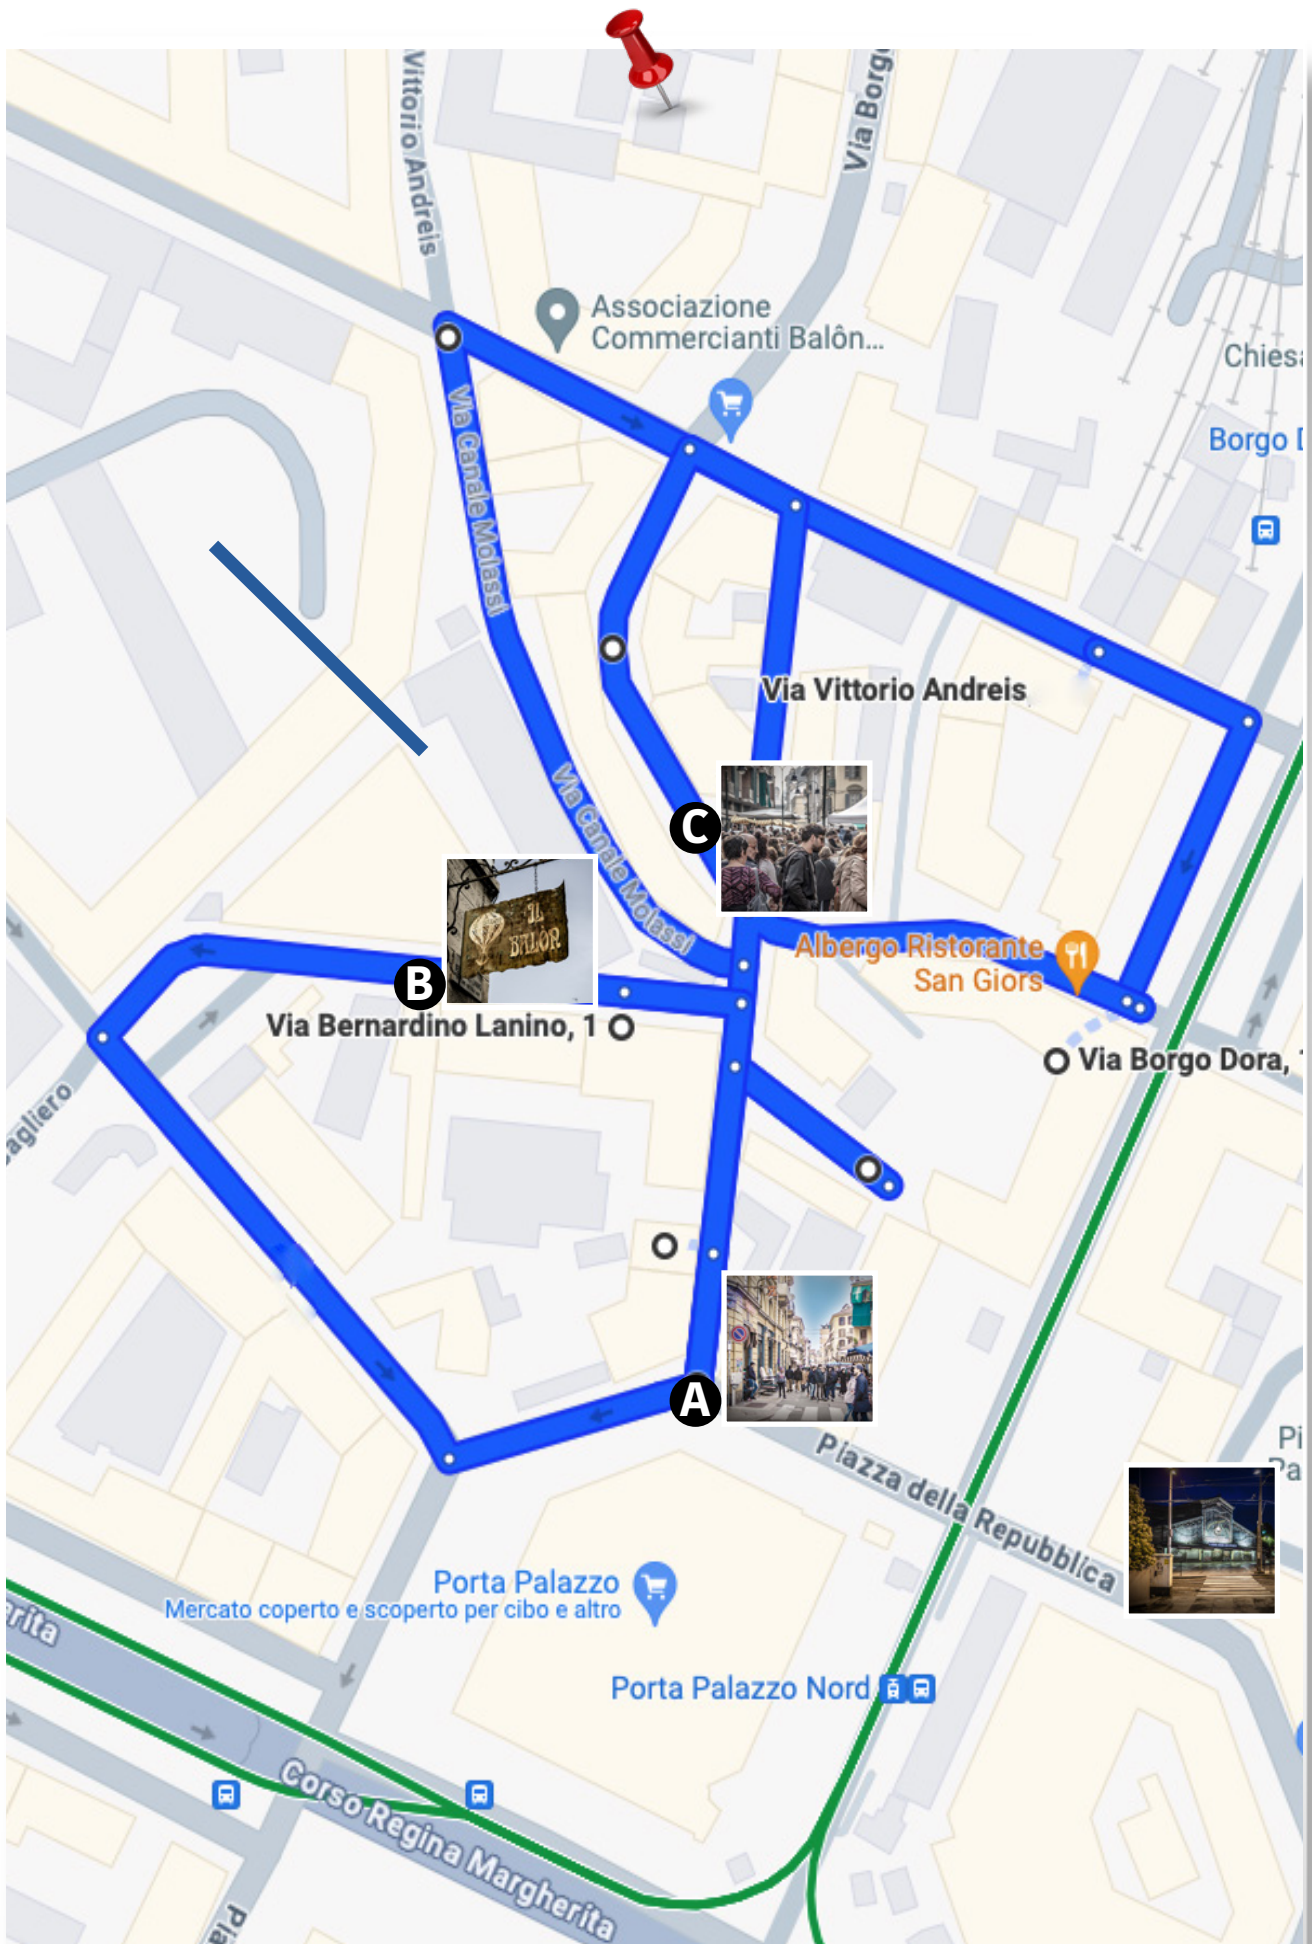

“Il Balon” is also the ideal place for a snack with friends.

The restaurants in “Borgo Dora” offer you some delicious aperitifs’, coffee and dinners in the **historic taverns**.

The atmosphere of the market is unique, with a strong historical identity that makes every visit special.

DESIGN

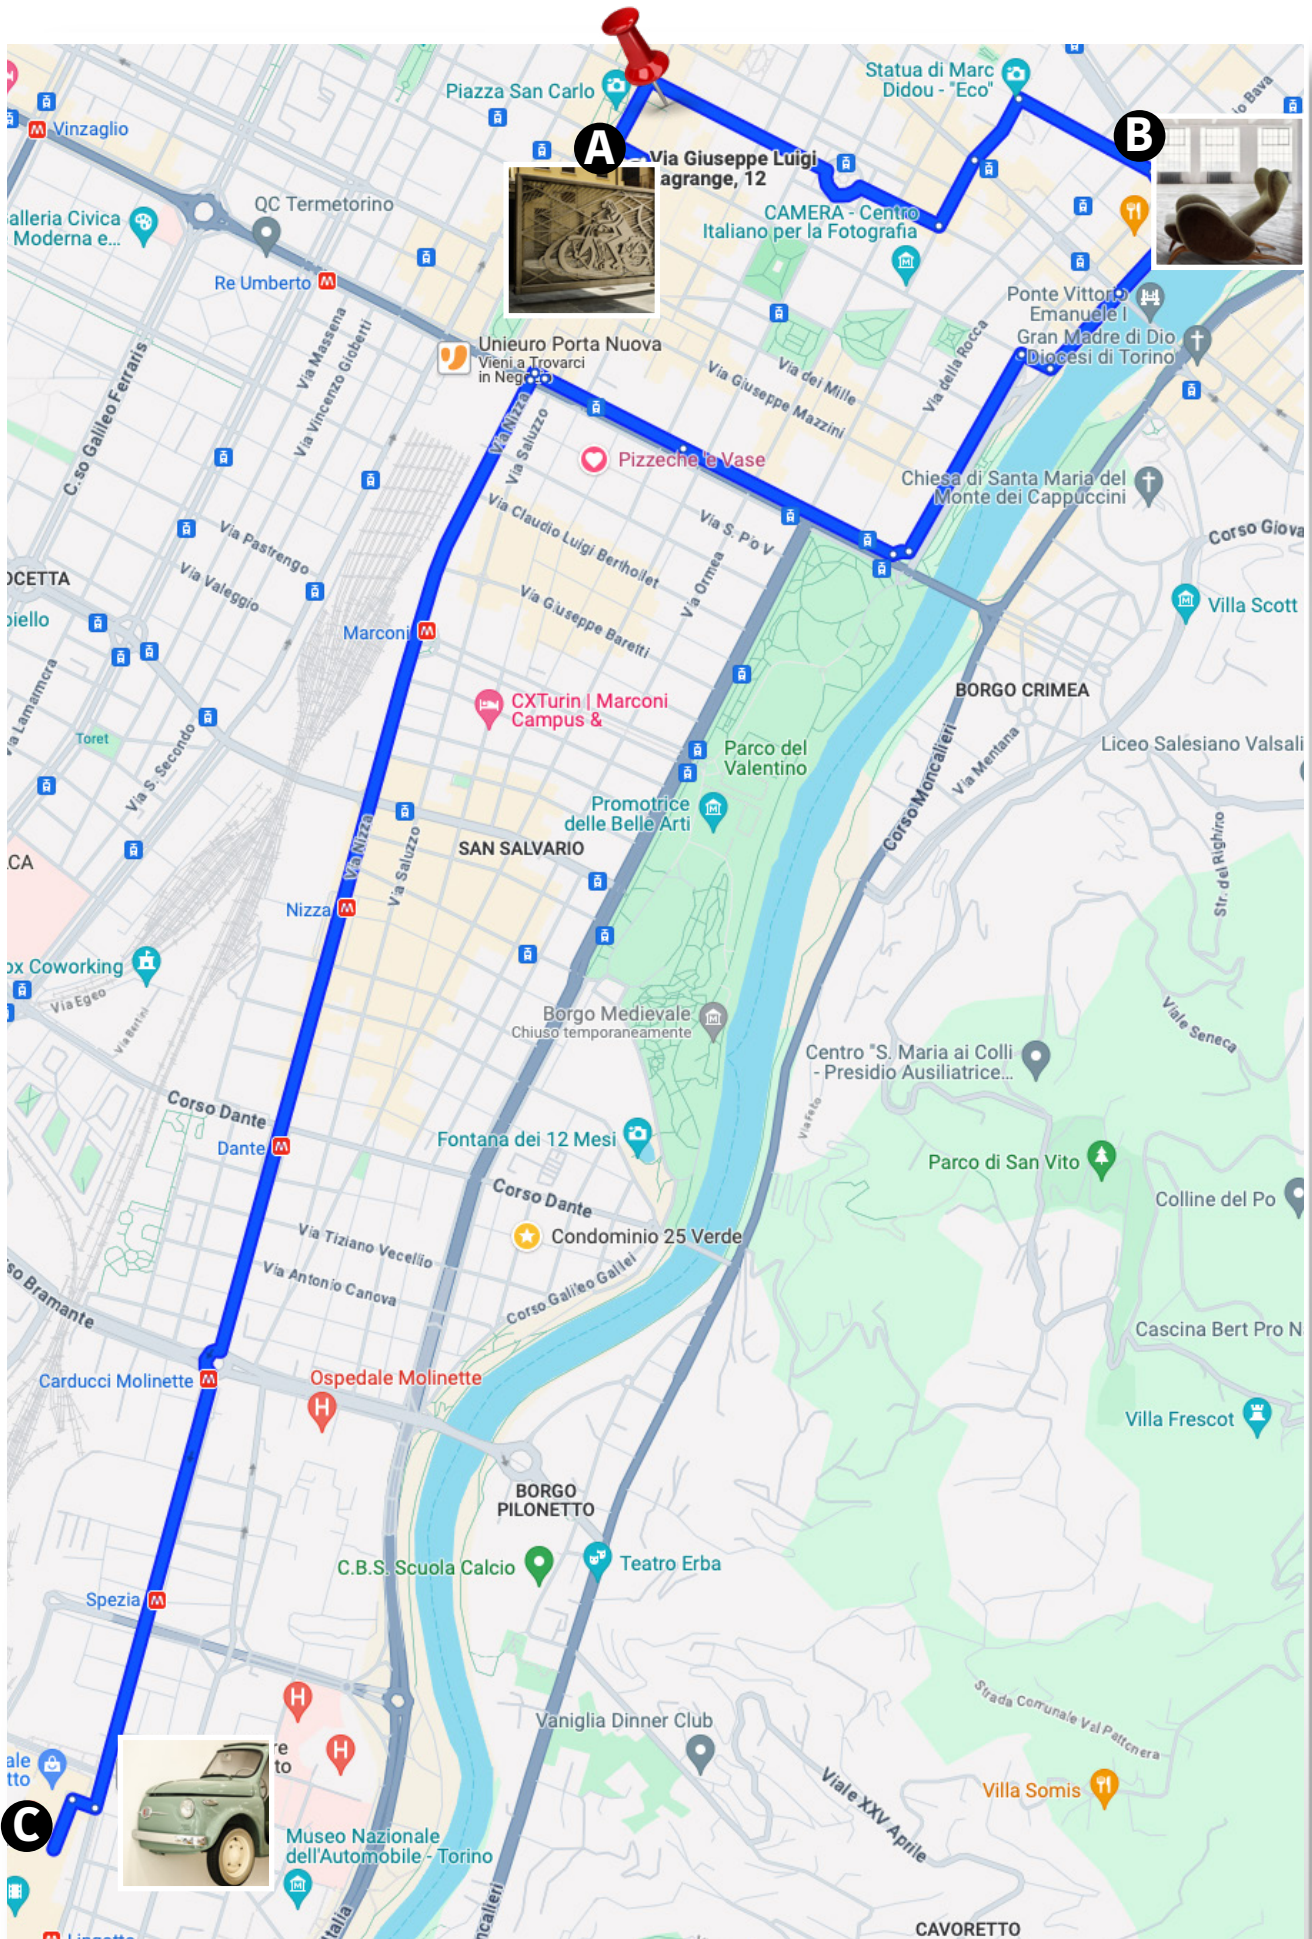

Are you curious to know how design can transform a city? Then, let yourself be surprised by [Richi Ferrero](#)'s creations. This Turin artist is a pioneer in the theatrical lighting of monuments. He illuminated the [Gran Madre](#) of Turin and participates in "[Luci d'Artista](#)". He created the [Cancello Futurista](#) in honor of "Fortunato Depero", and the [Equinox](#) sculpture, which watches over the skies of Turin.

But we still go on, because Turin has been the home of visionary movements and designers, such as [Carlo Mollino](#). Photographer, architect and interior designer, Modernism, Surrealism, Liberty, Baroque and Rococo come together in his works.

Turin also welcomed [Radical Design](#), famous for the break between Modernism and the desire to renew design. [Guido Drocco and Franco Mello](#), with their iconic [Cactus](#) produced by Gufram in 1972, are among the most important exponents of the movement in Piedmont.

And speaking of design made in Turin, can we not mention the Fiat 500? Born in 1957, she has become an icon of Italian style. An advice? Pay a visit to [Casa 500](#): you will experience an extraordinary "different" journey into Italian automotive culture!

LIBERTY

Did you notice? Turin is not only Baroque and Savoia Royal palaces', but there's also a lot of [Liberty](#).

This style flourished in Turin thanks to the emerging bourgeoisie of the early twentieth century. It has been chosen by them, to affirm their social status.

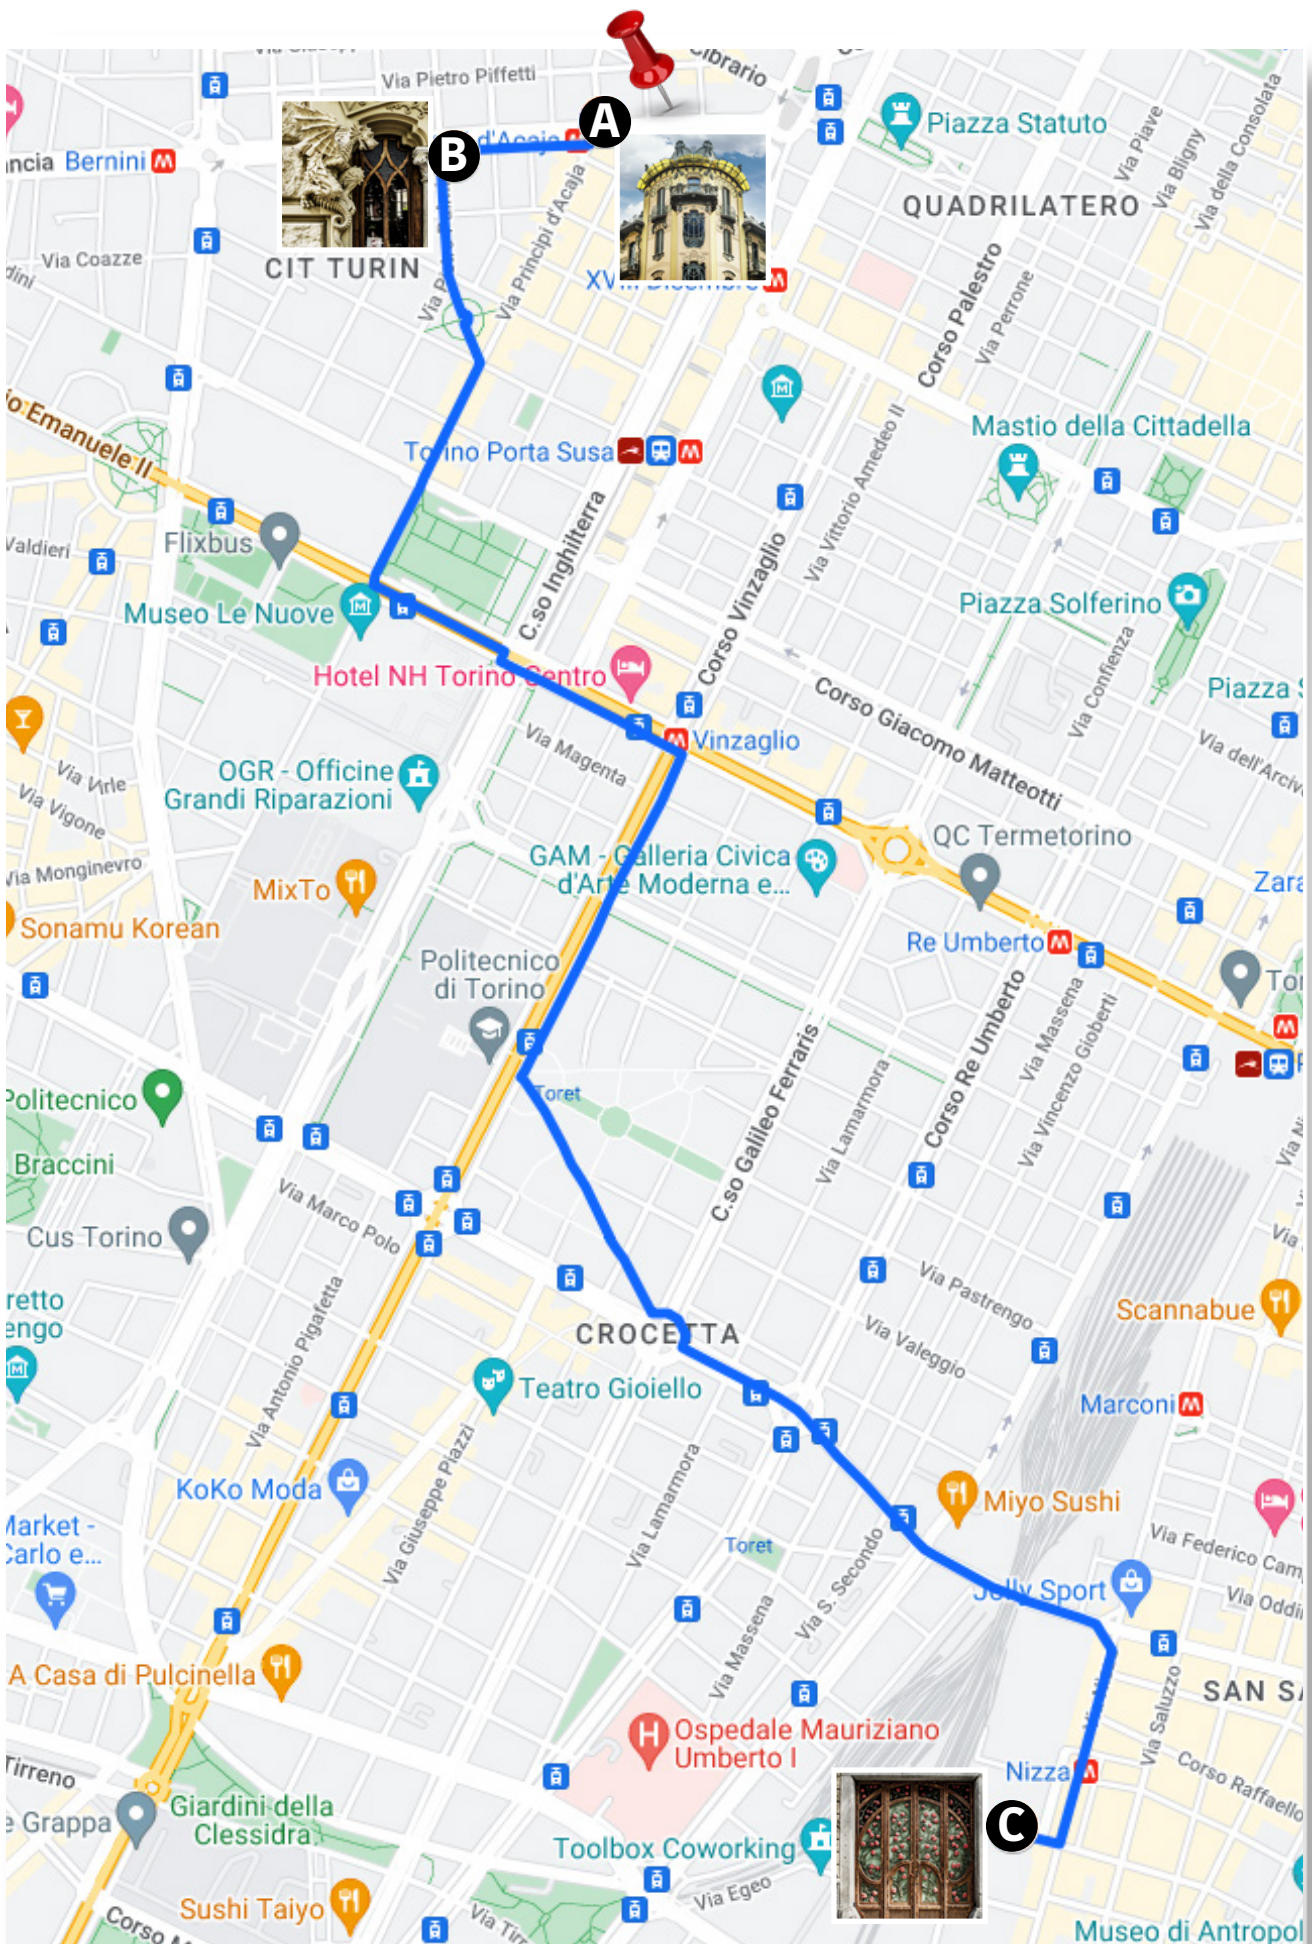

A suggestive example is "Casa Fenoglio", designed in 1902 by **Pietro Fenoglio**. The decorative elements enhance the floral style, remembering the shelters of the **Paris** metro.

And the [Casa dei Draghi](#)? Known as "Palazzo della Vittoria", it celebrates Italy's victory in World War I, with a mix of **neo-Gothic** and Liberty style.

And the splendid **Portone del Melograno** in **San Salvario**? It is really a piece of ironwork art.

To admire the best of Liberty in Turin? Explore the "Cit Turin" district, which begins at **Piazza Statuto** and **Corso Francia**: you will discover fantastic buildings, it's a true feast for your eyes.

ICON

Why is the bull “il toro” the symbol of Turin?
As you may have noticed, the name of the city is linked to the image of a bull. Between history and legend.

On one hand, history tells us that the name derives from the [Taurini](#), a Celtic-Gallic people settled at the confluence of the **Po** and the **Dora Riparia**.

On the other, there’s a legend.

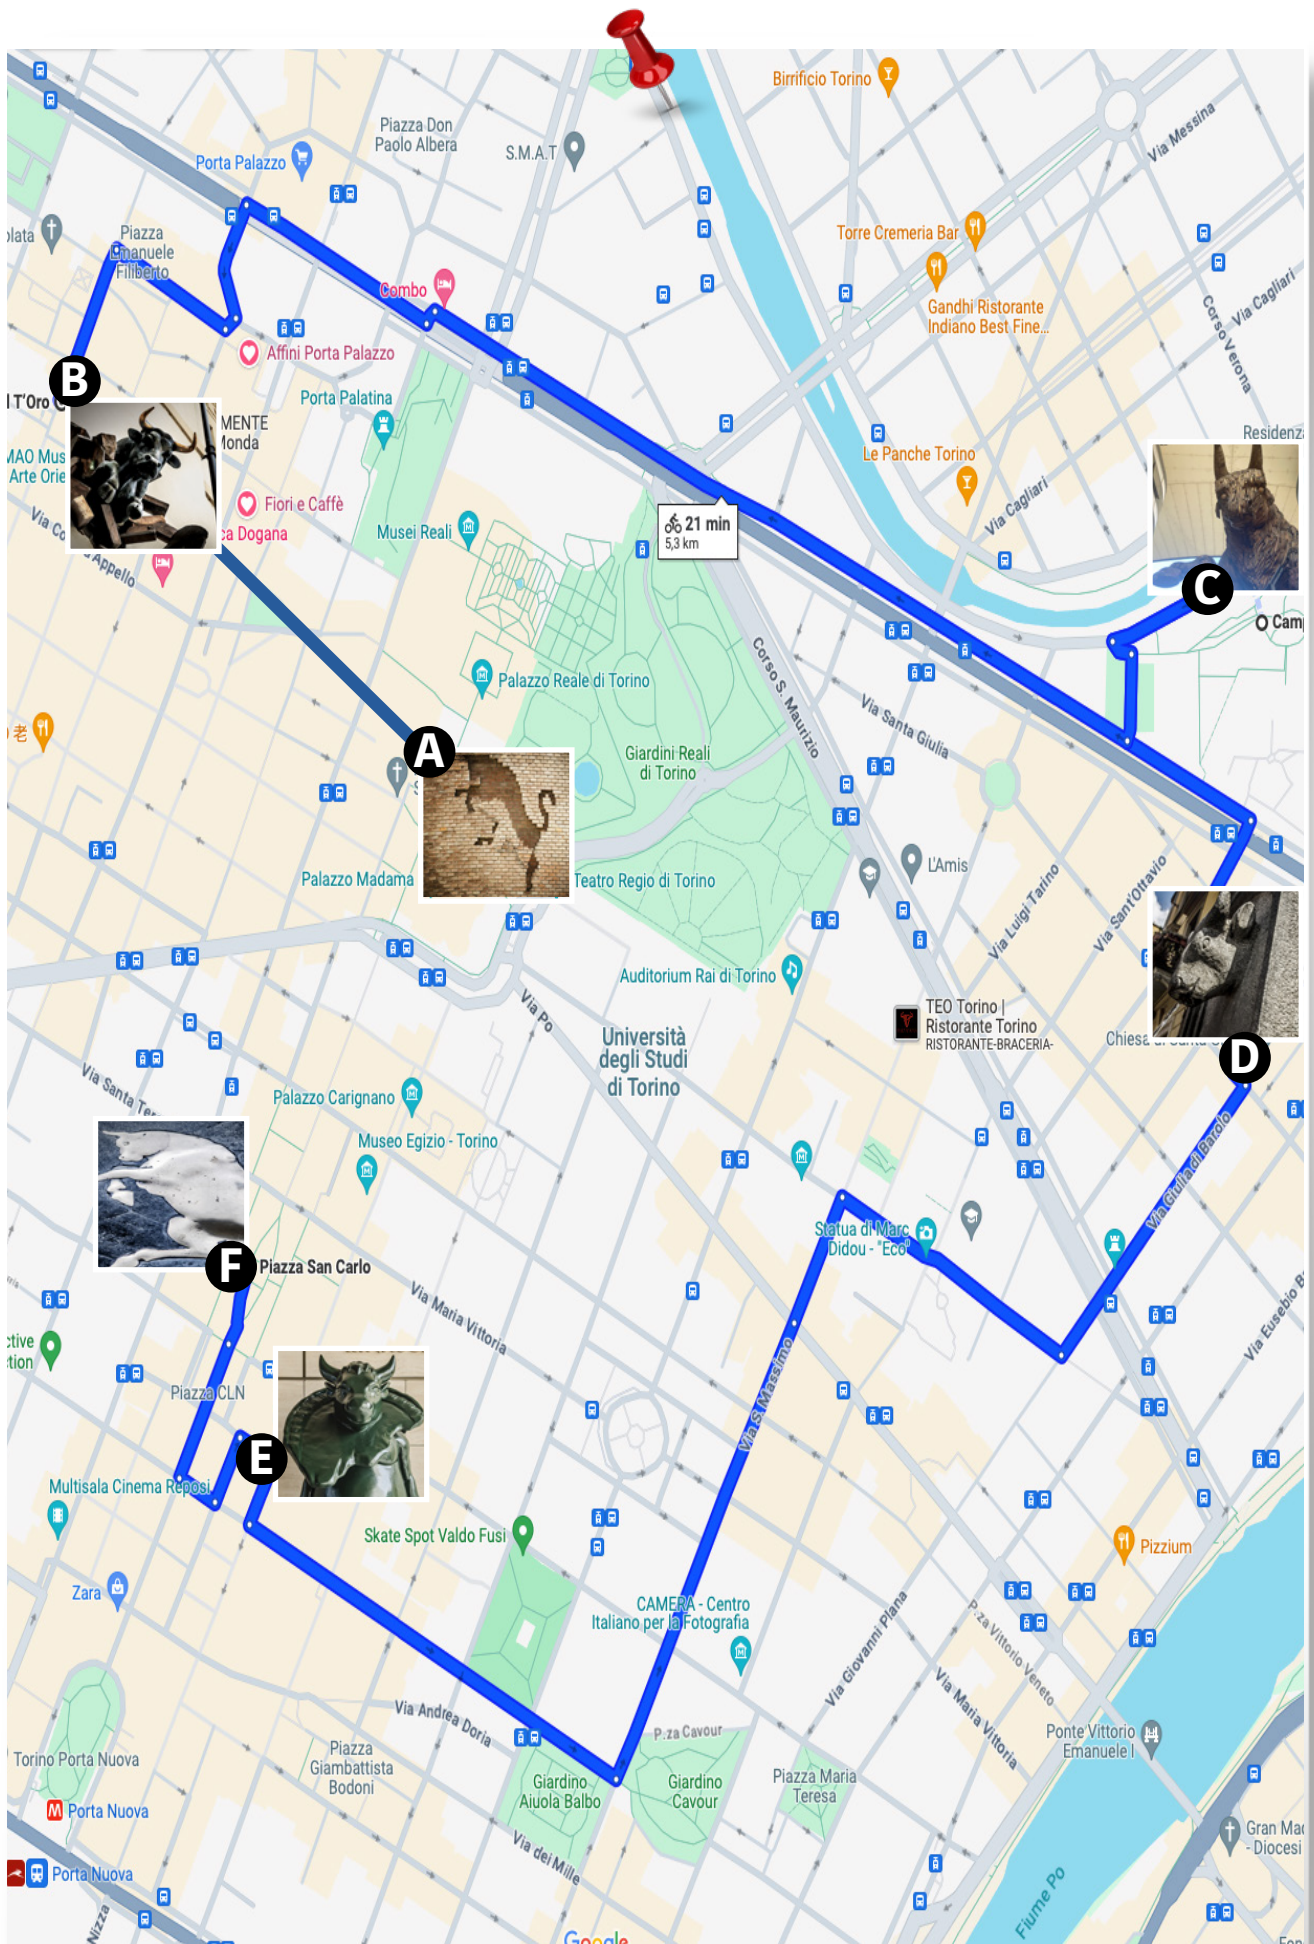

Telling us about a bull, defeating a dragon, which lived in the forests near the Taurini village.

This explains why the bull is everywhere. You will find it under the arcades, trampling it, will bring you good luck. You can recognize it in the famous [tùret](#), the little green fountains that dispense fresh drinkable water.

You can find it in cast iron, marble, bronze. The bulls decorates doors and frontside of buildings.

In short, the bull is truly an icon, celebrated by artists of the past and present.

MAGIC

Walking around Turin, you will feel observed! Dragons, lions and eagles peer at you from the facades of buildings, telling you stories of strength, wisdom and [mistero](#).

The city is a true open-air bestiary. Lionheads, symbols of nobility and protection, decorate the doors of **Via Milano**.

Eagles, symbols of power and freedom, soar in **Piazza San Carlo**.

In **San Salvario**, owls keep silent watch from the buildings.

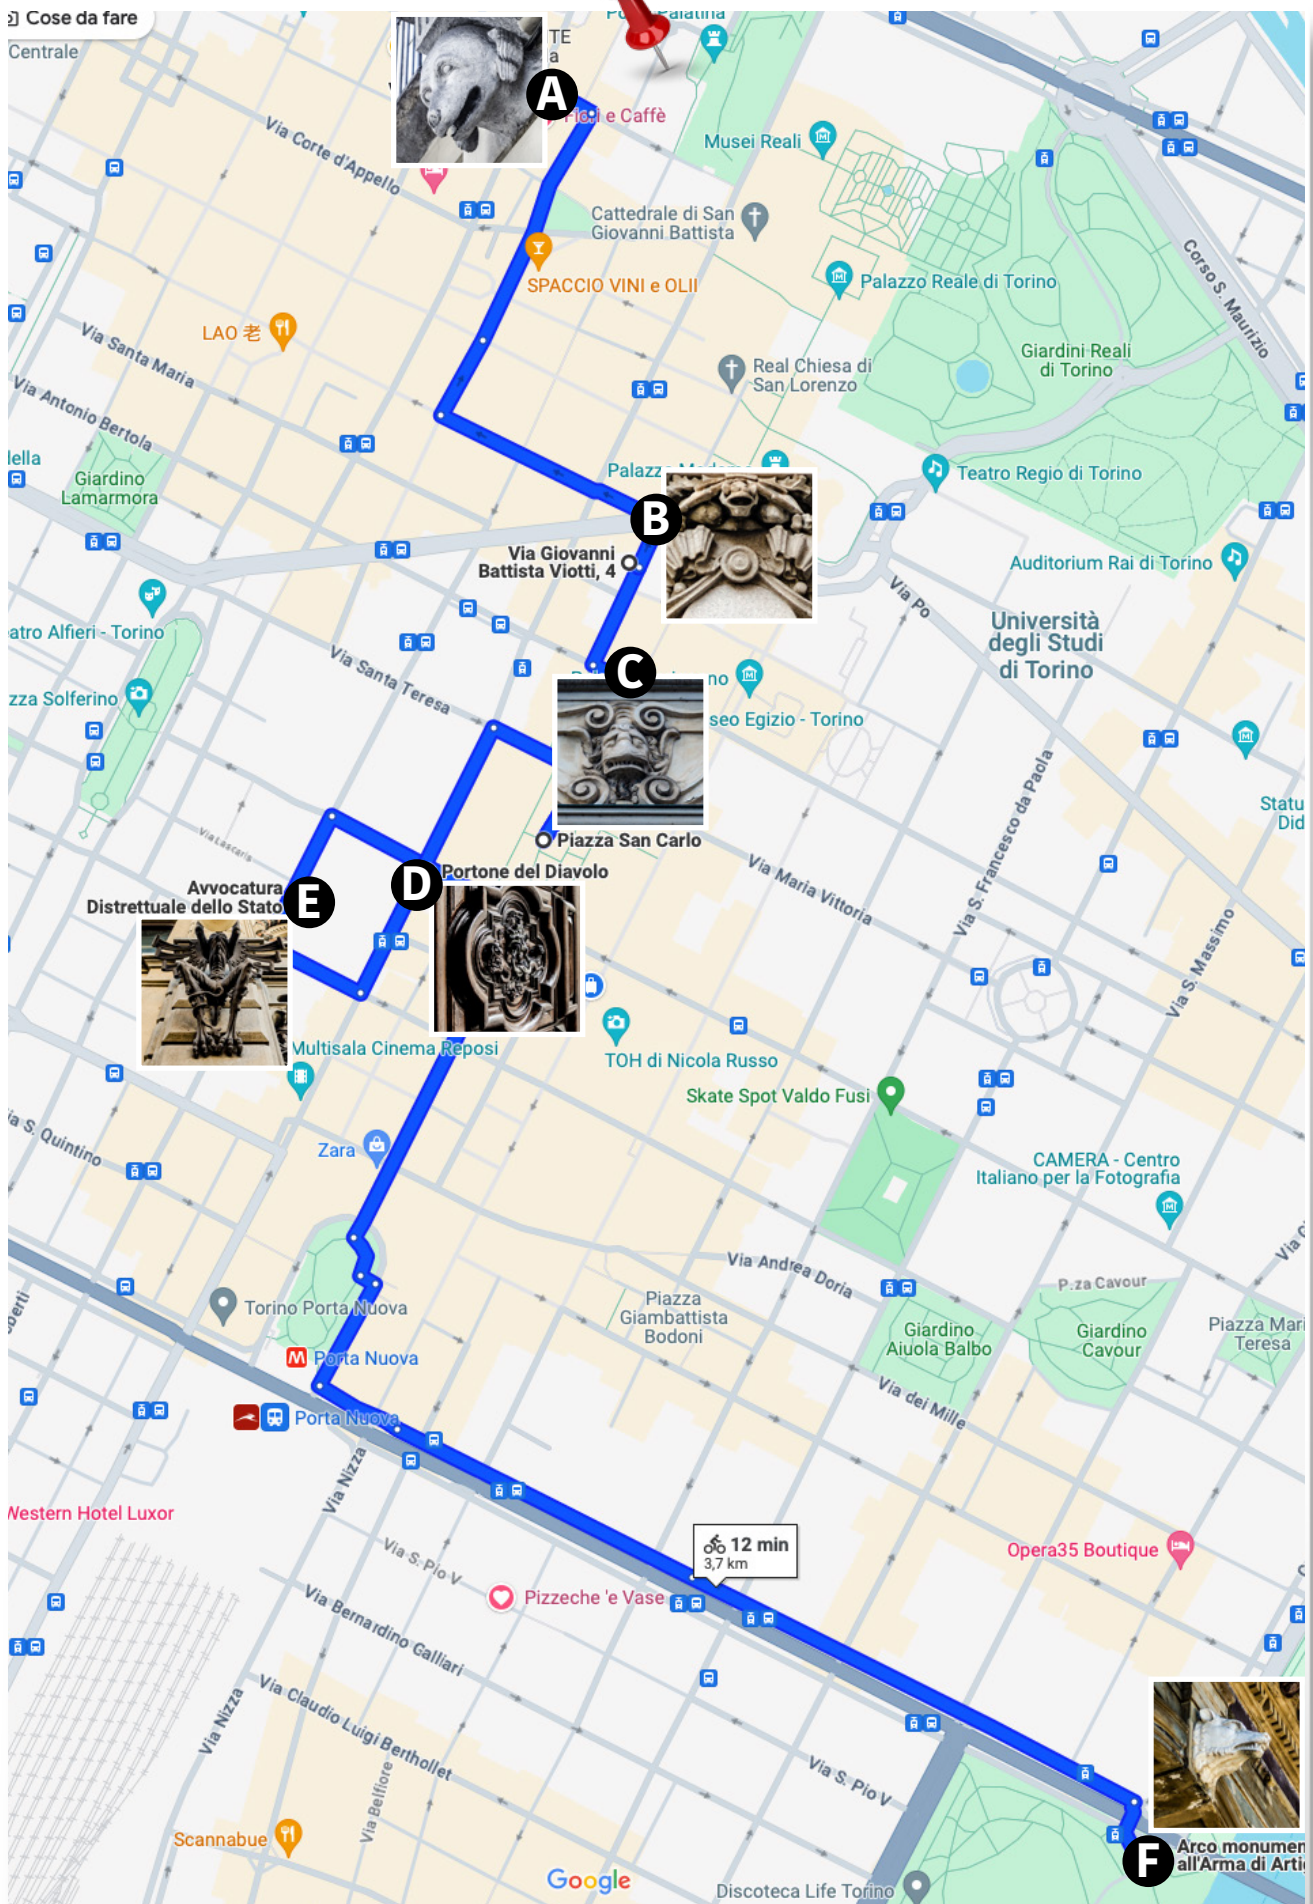

And then there are the dragons and griffins, half eagles and half lions, who guard the entrances with their grandeur.

These fascinating figures date back to the **Middle Ages** and the **Renaissance**, periods in which artists and craftsmen used them for protection and good luck.

Therefore, as you walk around the city, observe carefully.

Every door, every railing and every window has a secret to discover.

STRANGE

Have you ever seen a giant slice of polenta? [Casa Scaccabarozzi](#), also known as **Fetta di Polenta**, is a trapezoidal building designed by [Alessandro Antonelli](#). It's 16 meters wide on one side and just 54 centimeters on the other, it is a masterpiece of extravagant engineering.

But the oddities don't end there. In **Corpus Domini square**, there is the **house with the Piercing**. Also known as "Baci Urbani", it's an installation by [Corrado Levi](#). The piercing symbolizes modernity and rebellion, and the drops of blood (one red and one blue) represent the proletarian and noble soul of the city.

And what about the magnificent [Condominio 25 Verde](#) by [Luciano Pia](#)? It is a "palazzo foresta" green house, with trees growing on the terraces and gardens on the roof. Located near the **Valentino Park**, it integrates vegetation with architecture, it's the first experiment in eco-sustainable bio-architecture in Turin.

CREATIVITY

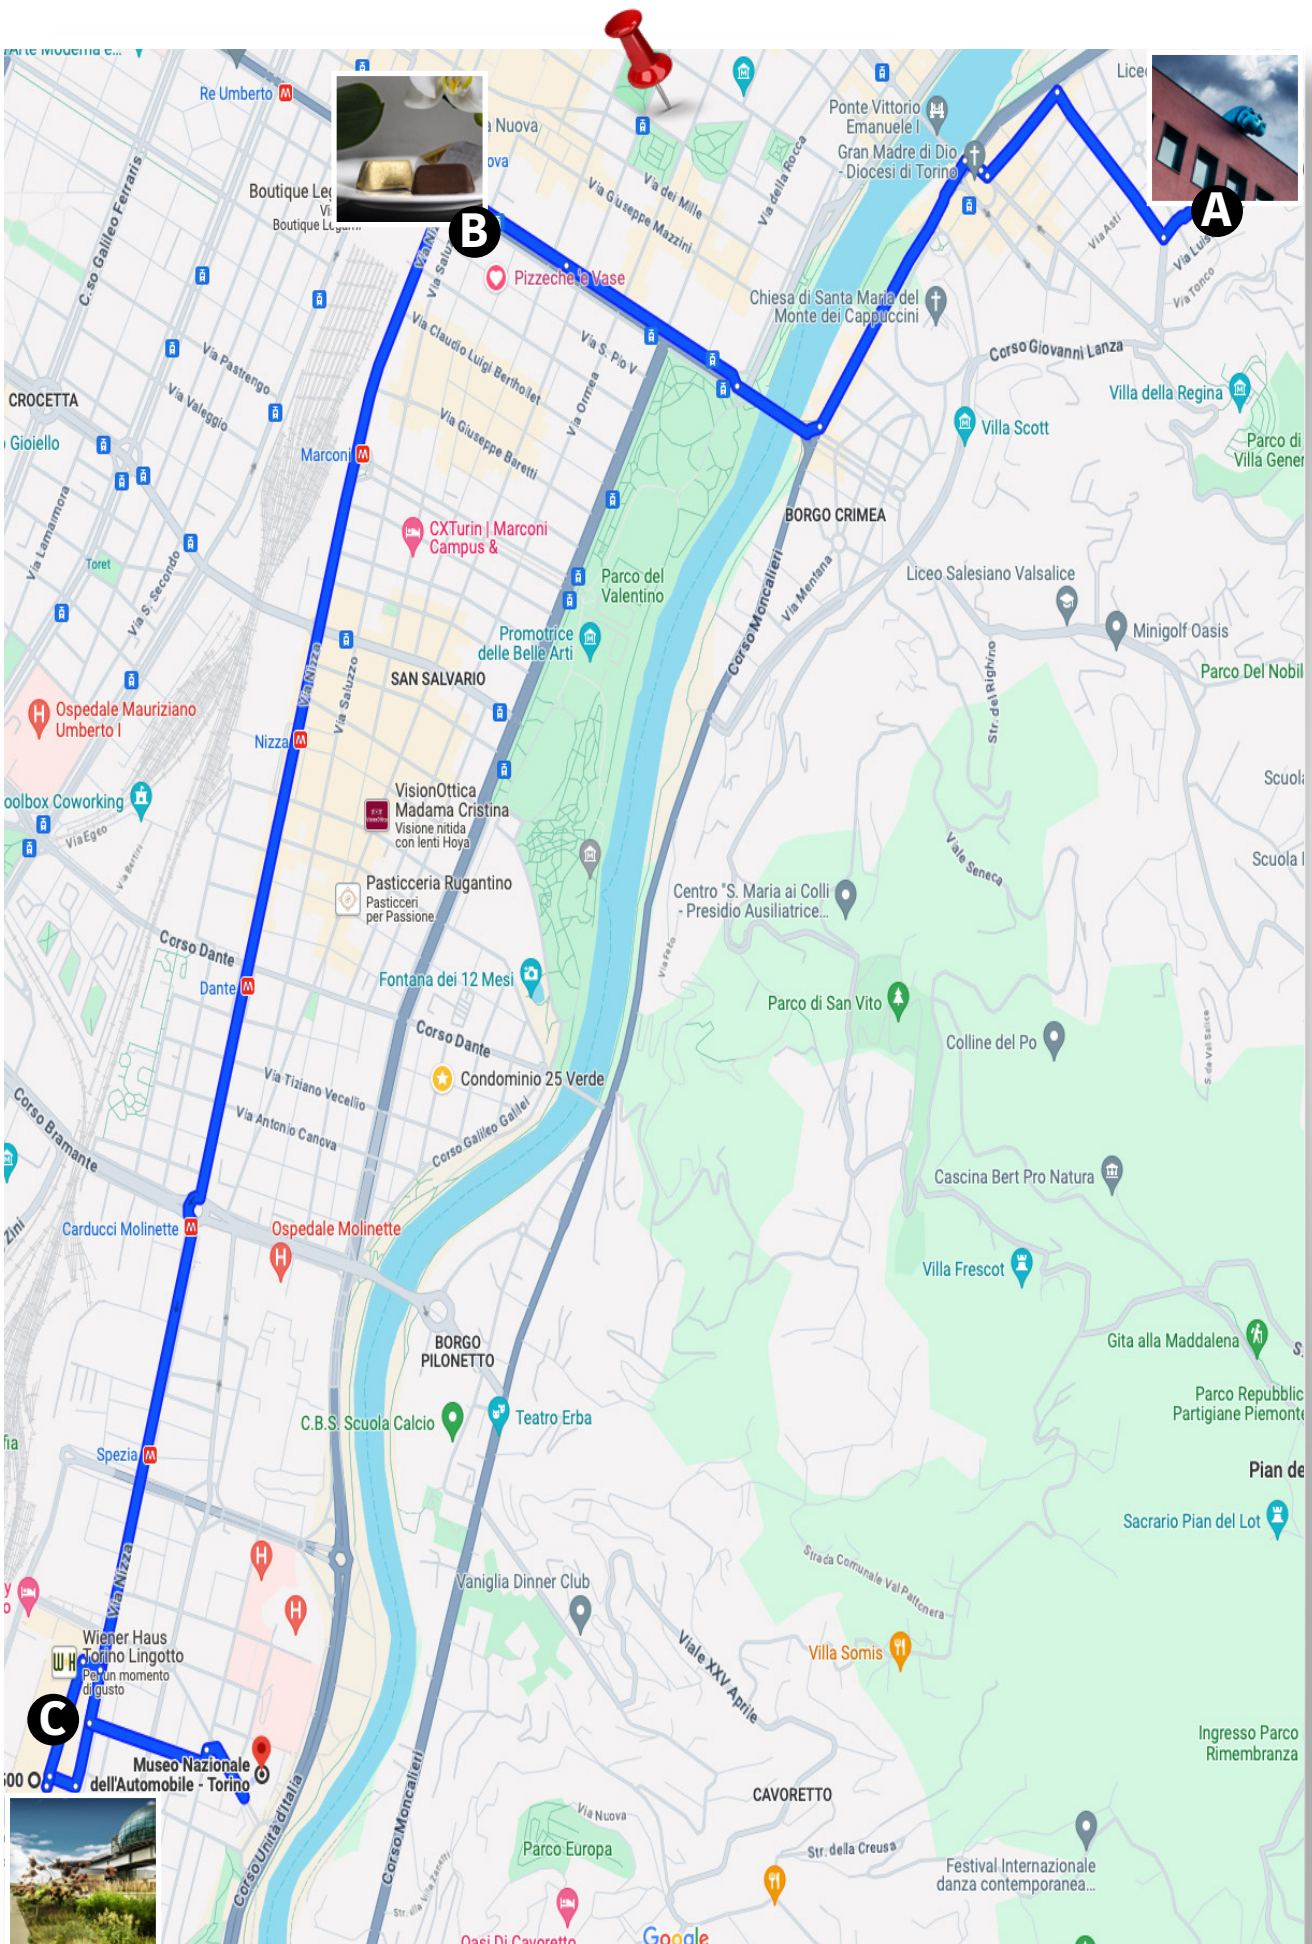

But what is a blue Hippo doing on the top of a building? It is [Pippo](#), an advertising icon, created by [Armando Testa](#), a brilliant advertising genius from Turin. He's the founder of one of the most famous advertising agencies in the world.

This is just one example because, when it comes to creativity, Turin is second to none.

Another example? [Il Gianduiotto](#) born during the Napoleonic blockade, when the importation of cocoa was prevented. And what did the Turin pastry chefs do? They replaced cocoa with hazelnut and thus was created "Gianduaia."

And Giovanni Agnelli, the king of creativity? Founder of FIAT, he made Turin a beacon of the automotive industry. Today, the [Pista Lingotto](#), renovated with artistic installations, lets you experience the future of the city. Check it out! Also take a look at the [Museo dell'Automobile](#): you will discover a lot about Turin's creativity!

GOFRERIA PIEMONTEISA

Are you ready to discover real Piedmontese street food? Gofreria Piemonteisa is the right place to go! Founded in 2005 by Dario, it is recognized by prestigious guides, such as Gambero Rosso, for its authenticity and quality.

Dario has got inspired by the Alpine traditions between the 15th and 17th centuries, bringing the ancient recipes of gofri and miasse back to life.

The gofri, crunchy honeycomb waffles, are prepared with a mixture of wholemeal flours. They are without eggs, milk or lard. This is why they are light and digestible.

The delicious miasse, thin and crunchy, are prepared with wholemeal corn flour and water.

You can enjoy both sweet and savory versions of these old aged recipes. In fact, you can fill them with ham, cheese, speck, paprika cream, tuna sauce, bacon, or with jams, chocolate and honey.

And do you know where the flours come from?

Dario himself grinds them using a stone mill present in the premises. If you want to know more, just ask: Dario is always happy to tell the story of his delicacies and to show you his mill.

He has been studying and channeling energy all of his life.

He is truly a magician, an expert on everything related to the spark that allows us to illuminate our homes, our lives.

So why wouldn't we believe him?

He lives in Turin, one of the first European cities with electricity.

A city that gives life to a festival of lights, "Luci d'Artista".

This is why you will find yourself, having a "blown" fuse,

or if you want lighting suitable for your home or your shop,

wanting his service, call him!. And let's hope he doesn't show up with a giant light bulb in his hand...Like he did with us!

ARTIGIANINO TORINO

Perhaps it happens to you too. When we visit a city, we love to take home a memory for ourselves or for the ones we love, a gift that contains its soul. And what's better than an artisanal product, made with passion and attention? An object that has history, tradition and love within. This is why we can only suggest you enter the world of Artigianino.

As soon as you cross the threshold, the unmistakable scent of vegetable tanned leather envelops you, while your hands touches bags, belts and wallets with an extraordinary softness.

Massimiliano and Giovanna, the artisans behind Artigianino, put their heart and soul into every creation.

Their expert hands transform the leather into unique pieces, respecting ancient tanning traditions. Each item is a masterpiece, the result of careful workmanship.

At Artigianino Torino you will find refined bags, resistant belts and elegant wallets, all made with high quality leather.

Each piece tells a story of passion and dedication, perfect for those looking for something truly different, which comes with the mastery of the best craftsmanship in Turin.
